Shubham Kumar Yadav

Hello, I am Shubham Kumar Yadav, a passionate Android and Web Developer skilled in PHP, JavaScript, Kotlin, and Python, with experience in both front-end and back-end technologies. Currently interning at Salesqueen Software Solutions, I'm gaining hands-on experience building and deploying live projects like portals and e-commerce websites. I've also worked as a Counselor in the Admissions Cell at Gautam Buddha University and contributed to an online Bonafide certificate system. Passionate about learning, I've explored chatbot development and API testing through IBM SkillsBuild and Postman. I am always excited to improve my problem-solving skills and stay updated with the newest developments in technology. I also enjoy collaborating with teams to bring creative ideas to life and enhance project outcomes.

- **Tools & Frameworks:** IBM Skills (Chatbot), XAMPP, Microsoft Excel and POSTMAN API.
- **Additional Skills:** Figma, PowerPoint, Canva, Word, VB.NET (Visual Basic.NET), GitHub, Apollo Server.

PROJECT

Portfolio: ↗

Developed a responsive portfolio website using HTML, CSS, Bootstrap, and JavaScript to showcase 15 projects, skills, and personal details with a user-friendly interface. Check them out on my GitHub account: https://github.com/coshubham

Expense Tracking System: ↗

Built a full-stack Expense Tracker with **Node.js, Express.js, MongoDB, GraphQL** and **React**. Integrated JWT authentication, expense management, and Chart.js for data visualization, using **React + Vite** and **Tailwind CSS** for a responsive UI.

Online Food Delivery (FoodHut): ↗

Developed **FoodHut**, an online food delivery platform using **HTML, CSS, JavaScript, Bootstrap**, and **PHP** with **MySQL** for backend and an **IBM Skills-built chatbot** for enhanced user interaction and a user-friendly **admin dashboard** for **managing orders**, **menus**, and **user data**.

Car Rental Website ↗

Developed a dynamic Car Rental Website using **HTML**, **CSS**, **Bootstrap** for responsive front-end design, with **PHP** and **MySQL** powering the backend. Implemented a comprehensive admin panel and dashboard for managing cars, bookings, users, enabling efficient operational control.

Chatting Android Applications: ↗

Developed a feature-rich chat app in **Android Studio** using **Kotlin** and **Firebase** for **real-time data**, with a **web-based admin panel** and **dashboard** built using **PHP** for backend operations and **HTML**, **CSS**, **Bootstrap**, and **JavaScript** for the UI, with designs created in **Figma**.

Hostel Management System: ↗

Created a VB.NET application for student registration, room allocation, fee management, and report generation, improving hostel operations. Integrated database connectivity for efficient data handling and automated administrative workflows.
